

Data shows that over 84% of human-caused wildfires are ignited in high-risk areas adjacent to roadsides and under utility lines.

## PREVENTATIVE WILDFIRE SOLUTIONS

**PHOS-CHEK® LONG-TERM RETARDANTS CAN PREVENT FIRES FROM STARTING AND HELP STOP WILDFIRE IN ITS TRACKS.** For over 50 years, PHOS-CHEK has been applied from the air by the world's largest fire management agencies. PHOS-CHEK Ground Applied products have the same superior performance, adding precise, cost-effective placement and the ability to apply retardant in advance of fire at night and during low visibility conditions such as smoke inversions. PHOS-CHEK long-term retardants help prevent the start of wildfires by treating wildland fuels in place and rendering them

non-flammable. They can be applied by almost any standard equipment that sprays, including Perimeter Solutions' custom Ground Applied equipment. All products have a high level of fire retardant effectiveness, with differences in product form, adherence to vegetation and durability through weathering. Today, Perimeter Solutions offers a comprehensive range of ground applied fire retardants – PHOS-CHEK® FORTIFY® for season-long protection and PHOS-CHEK LC95/259-Fx technology for fast application during scheduled burn or emerging wildfire conditions.

### PRODUCT OPTIONS/ATTRIBUTES

<b>PHOS-CHEK FORTIFY</b>	<b>Resistance to 2" of rain; Season-long durability; Superior adherence to fuel.</b>
<b>PHOS-CHEK LC95/259-Fx</b>	<b>Fully qualified by USDA; Effective up to 1/4" rain.</b>

PHOS-CHEK LC95 and related grades are on the USDA Forest Service Qualified Products List (QPL) and is the fire retardant of choice for all public lands. PHOS-CHEK FORTIFY is an effective solution in areas where QPL products are not required.

# PREVENTATIVE WILDFIRE SOLUTIONS

## SOLUTIONS FOR EVERY WILDFIRE PROTECTION NEED

### PHOS-CHEK FORTIFY FIRE RETARDANT

PHOS-CHEK FORTIFY is an ideal fire retardant for applications when season-long protection is required, since it can provide retardant effectiveness when exposed to up to 2" of cumulative rain.

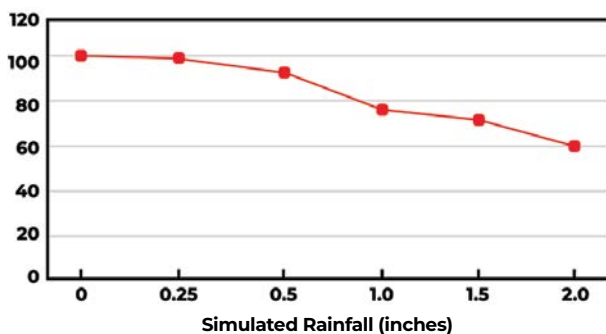

- Treatment of high-risk fire areas, including utility pole brushing & vegetation management
- Underneath utility lines to keep them energized, averting Public Safety Power Shutoffs (PSPS)
- Around critical infrastructure assets (substations, buildings, communication towers)
- Protection for power poles, easements and rights-of-ways
- Along railroad lines and railways in high-risk areas
- Ingress and egress paths from at-risk communities
- Pre-treatment of Prescribed Fire Control lines far in advance of ignition
- Military bases in active munition areas
- Hillsides and roadsides near communities with high fire-risk
- Extending roadway fire breaks
- Protection for wildland urban interface areas, campgrounds, and other common ignition areas
- Protection for historical areas, National Monuments and sensitive and endangered habitats

### PHOS-CHEK LC95/259-Fx FIRE RETARDANT TECHNOLOGY

PHOS-CHEK LC95 and PHOS-CHEK 259-Fx are products of choice for applications requiring a QPL-listed material. They are the technology of choice for applications requiring a QPL listed product. It is ideal for rapid deployment and potential fire events that are scheduled. Perimeter Solutions offers several grades based on this technology for different application environments.

- USDA Forest Service QPL listing
- Pretreatment of utility easements and infrastructure
- Utility rapid response efforts ahead of a fire
- Around homes and communities with pending wildfire danger
- Ingress and egress paths ahead of a fire
- On physical utility poles with fires approaching
- Support of prescribed fires being conducted within days or weeks of application
- Prior to "hot work" that is being performed in high-risk fire areas

### PHOS-CHEK FORTIFY IS HIGHLY DURABLE
